

## KOENEN Hotscreen®

Precise temperature regulation from 30°C to 100°C with **KOENEN Hotscreen®**. When printing the paste, with the HotScreen® it hardens immediately upon contact with the substrate. This virtually precludes running of the paste one hundred percent.

### Hotscreen® – High definition print

#### Benefit of the Hotscreen®

- Homogeneous print
- High life time and minimal change in the screen tension
- Minimal flow characteristics of the paste
- Possible finger widths > 30 µm

#### Application:

- e. g. printing hot melt pastes
