

Protection for Precision Screens! KOENEN Life Time Technology

Via a **KOENEN** patented process technology flexible as well as highly resistant protective materials are accurately applied onto the screen with a selected layout position. This reduces the abrasive notching effect of the substrate and provides an active contribution to the **Life Time** of the **KOENEN precision screens**.

KOENEN Edge Protection

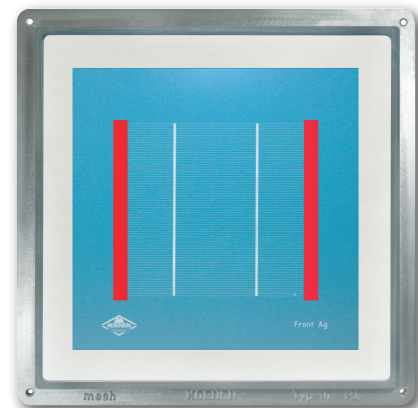

Product characteristics

- Reduced abrasive notching effect
- High degree of individualisation

Shape, position, alignment as well as the dimension of the edge reinforcement are adjustable to the individual printing demands of the client.

Cost savings by:

- Extremely high **Life Time**
- High **stability**

Schematic representation

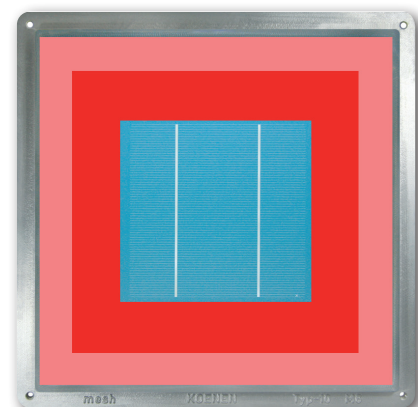

KOENEN Passepartout

Product characteristics

- Reduced abrasive notching effect
- Levelled printing behaviour
- High stability paired with chemical resistance
- Fabric and emulsion protection

Cost savings by:

- Extremely high **Life Time**
- High **stability**
